

ADA SCONCE 9

Solid sheet metal construction with modern LED technology makes this sconce both classic and contemporary. We mount adjustable reflectors on friction hinges to allow you to direct the wall-washing light of these sconces in an endless variety of angles. The Ada Sconce gets its name from the Americans with Disabilities Act (ADA), which dictates that sconces in hallways must not protrude from the wall more than 4". Suitable for exterior use.

CARE | Clean with soft microfiber cloth which can be dampened if necessary.
