

# LONG CHURCH CHANDELIER

Originally designed for modernist architect Rudolph Schindler's Bethlehem Baptist Church, the Long Church Chandelier was designed to cast light up and out. The two exposed globe bulbs held aloft at its upper ends punctuate the long axis of the chandelier. Four shorter arms radiate out and down from a octagonal hub to complete the lightweight design. The Long Church Chandelier is a tensegrity structure, with the steel arms floating in compression, balancing the tension force of the cloth-covered electrical cords.

**CARE** | Clean with soft microfiber cloth which can be dampened if necessary.
