The Slide Drop Pendant 10 comes with options for standard drop tubes that can be specified to achieve a desired fixture elevation. Drop tubes longer than 24" incur a $50 upcharge.

When ordering your Slide Drop Pendant drop tube, please refer to the line drawing and table showing the various overall fixture heights with our standard drop tubes.

Two drop tubes can be joined to achieve longer drops. A 3" tube can also be added to the drop tube assembly to achieve an in-between dimension not reflected in the table.

Hanging heights are a matter of personal preference but we like hanging our Slide Drop Pendants so that the bottom of the shade is 24-32" above tables and 30-36" above counter-tops.
